LightMaster LAN Node Addressing

ADDRESS

Addressing Switches (Address 6A shown as an example) A sticker is provided to note node address.

ADDRESS _____ / _____

ILC
800-922-8004

IN **OUT**

Address Sticker

LightMaster Processor Board and Keypad

- Each networked LightMaster relay control panel must be given a unique 2-digit node address using the addressing switches noted above. Settings from 01 to FF can be used to address up to 255 unique addresses.

- This 2-digit address code system is also used with LightSync data line devices.

- Note all node addresses on the supplied sticker for future reference (they will be needed for programming).
