

High Voltage Divider Detail

Typical LightMaster 16 Enclosure Layout
shown with EM/120/277 VAC Voltage Dividers

LightMaster 16 Relay Panel

- Divider can be factory or field mounted between each pair of relays, for dividing 120 from 277 VAC sections, or normal from emergency sections
- Emergency section should be located at the top of panel to allow the power supply transformers to be connected to a dedicated emergency circuit 120/277 VAC
